

# ZABBIX

## Monitor anything with Zabbix.

Deploy Zabbix and get features that will enable you to monitor, visualize, and stay notified about the state of your whole IT stack - all within a single software solution at absolutely no cost!

Zabbix is a free and open-source enterprise level software that can be scaled to hundreds of thousands of monitoring endpoints across geographically distributed data centers.

# Monitor anything!

Leverage Zabbix's monitoring, alerting, and visualization capabilities and track the state of your whole IT stack.

An all-in-one monitoring, alerting, and visualization solution.

## But that's not all!

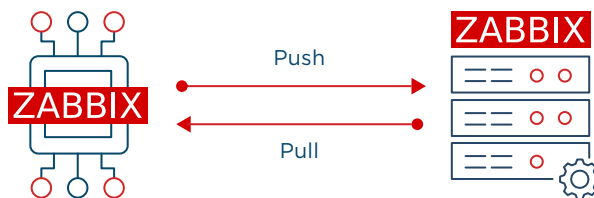

Zabbix comes packaged with over **250 official templates** for the largest software and hardware vendors.

# Data collection

Utilize a variety of **agentless data collection approaches** for the distributed monitoring of your endpoints - from servers and network devices to web applications and cloud deployments. If you can gather it, Zabbix can monitor it!

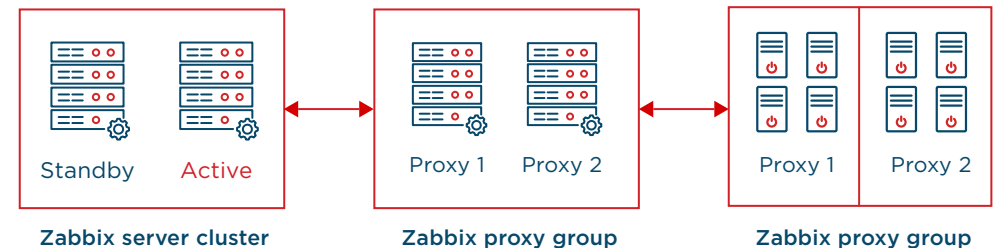

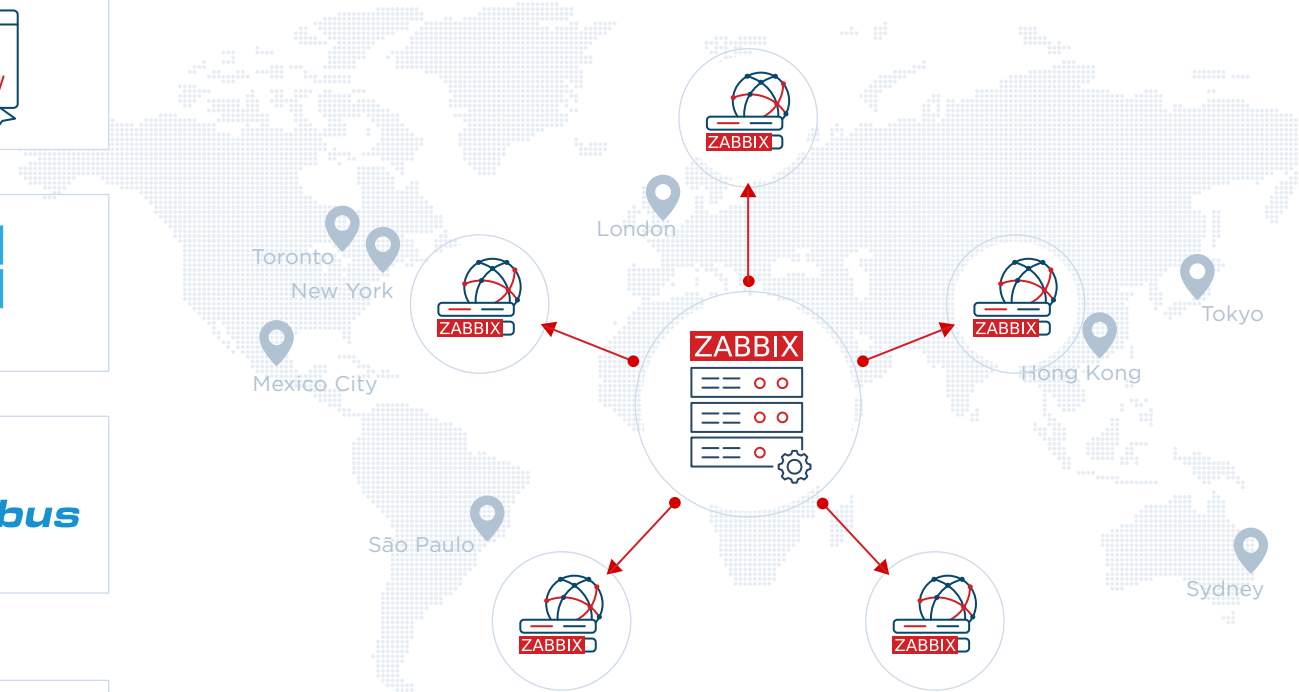

Deploy **Zabbix agent**, choose the direction of the connection and collect OS-level metrics from Windows and Unix-like environments.

# Scalability & redundancy

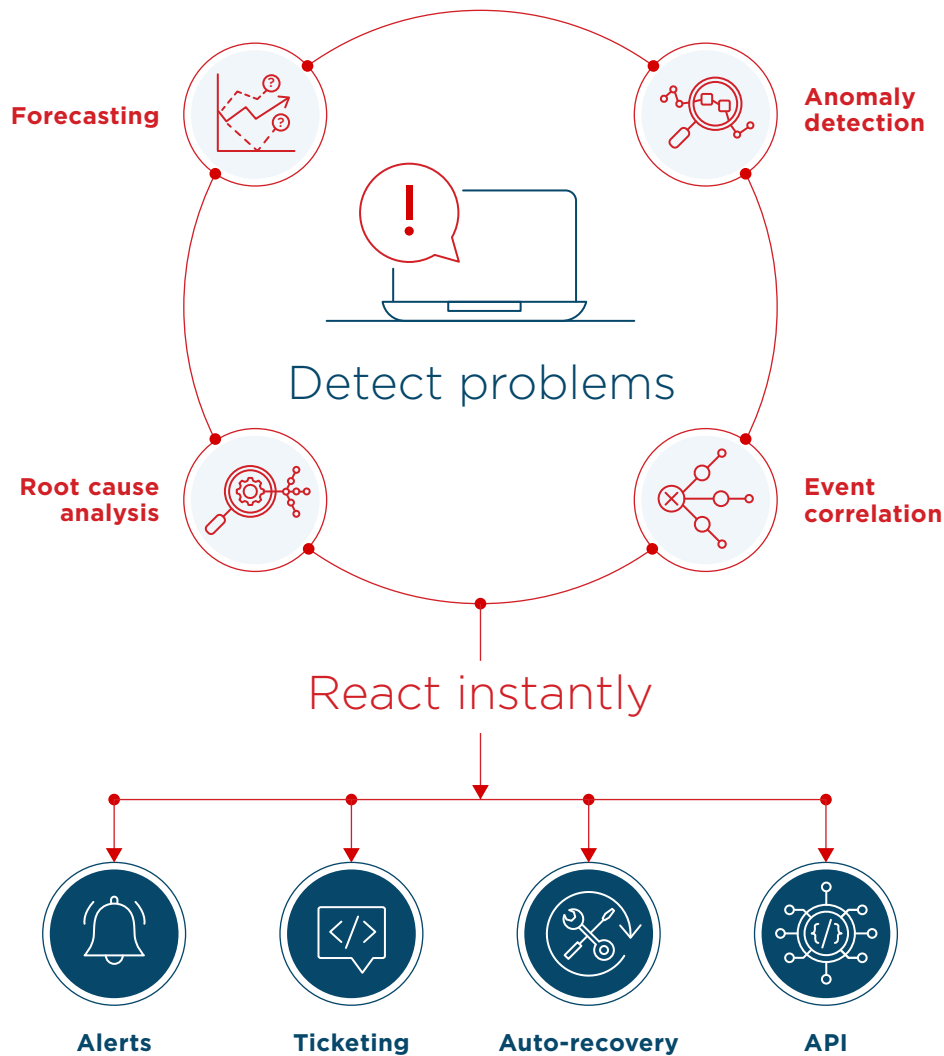

Collect data even during unexpected network outages by distributing your monitoring across remote locations such as data centers and branch offices all over the globe.

Zabbix provides a native host load balancing solution by allowing users to configure proxy groups and balancing hosts across proxies within a proxy group.

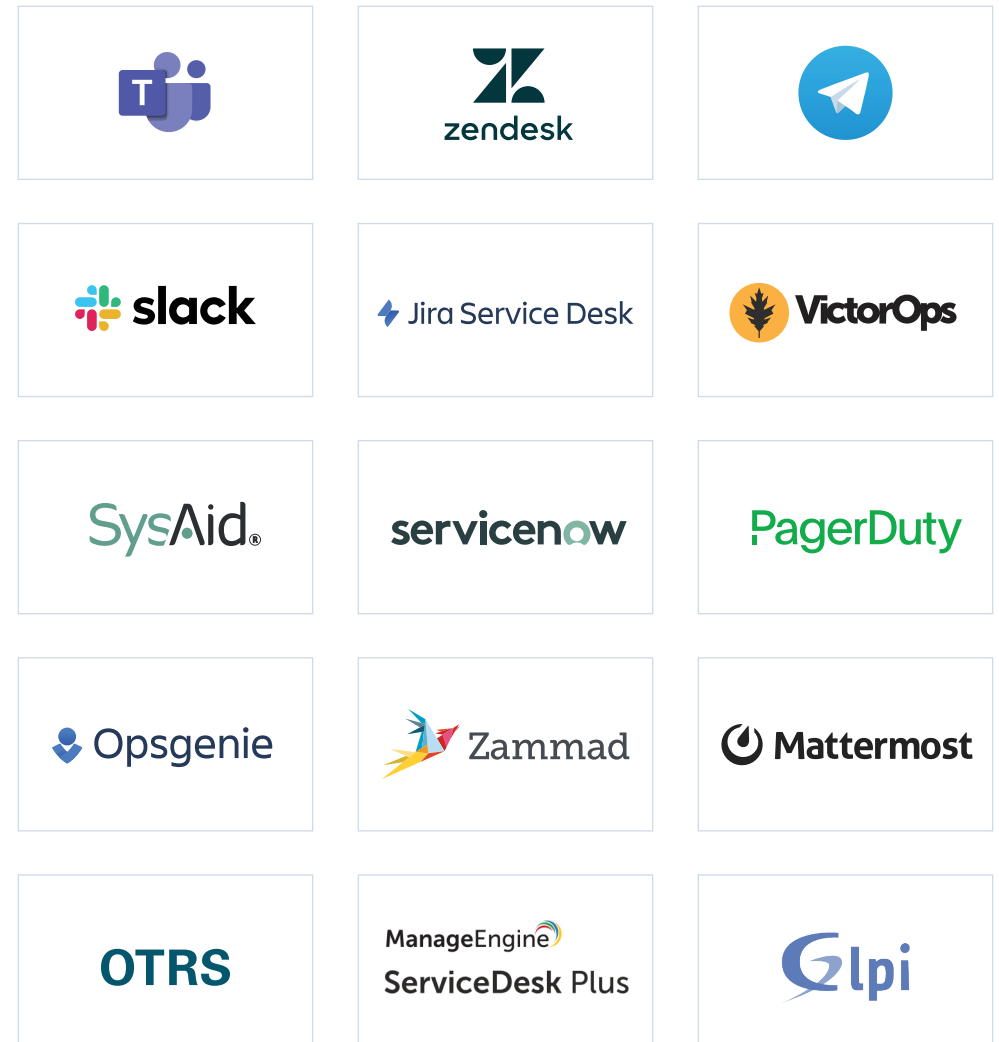

# Detect problems

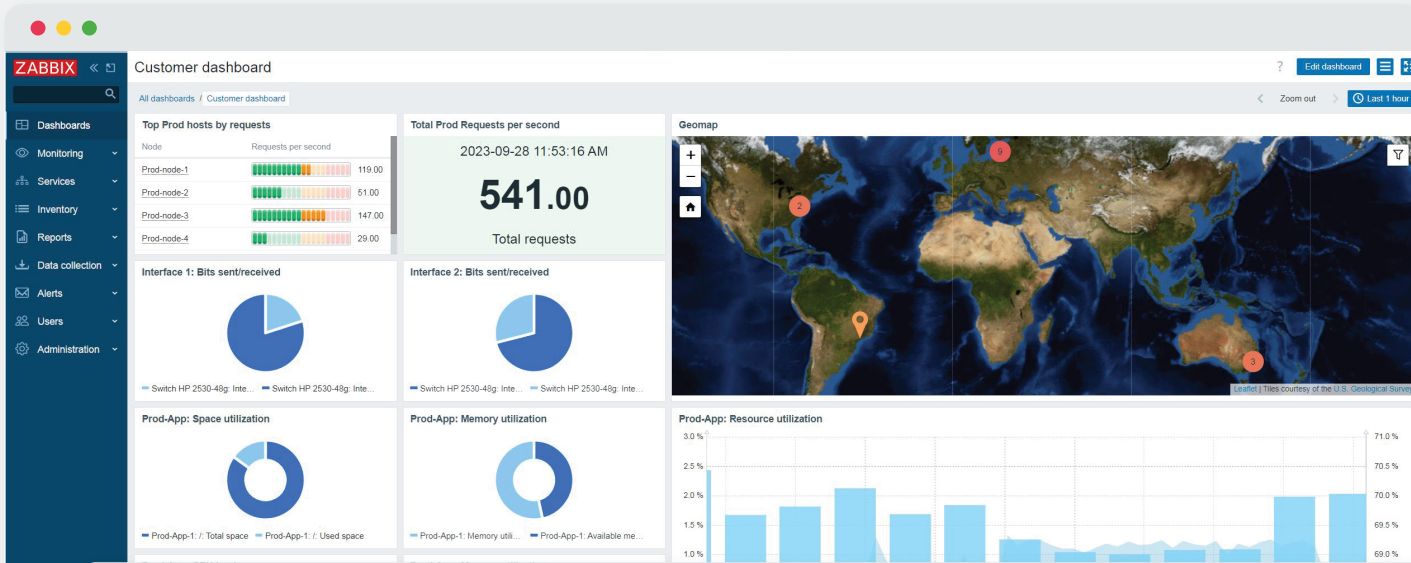

Predict, detect, and react to problems proactively with native forecasting, root cause analysis, correlation, and anomaly detection features. Send alerts, integrate Zabbix with ticketing systems, or automatically remediate detected problems.

# Alerting

Zabbix comes packaged with over 30 official integrations for a variety of ITSM, messaging, and ticketing vendors, so it's easy to get instant notifications and alerting.

# Visualization

Leverage a large selection of highly flexible dashboards and widgets to get a comprehensive view of your entire monitored infrastructure.

Dashboards

Performance data

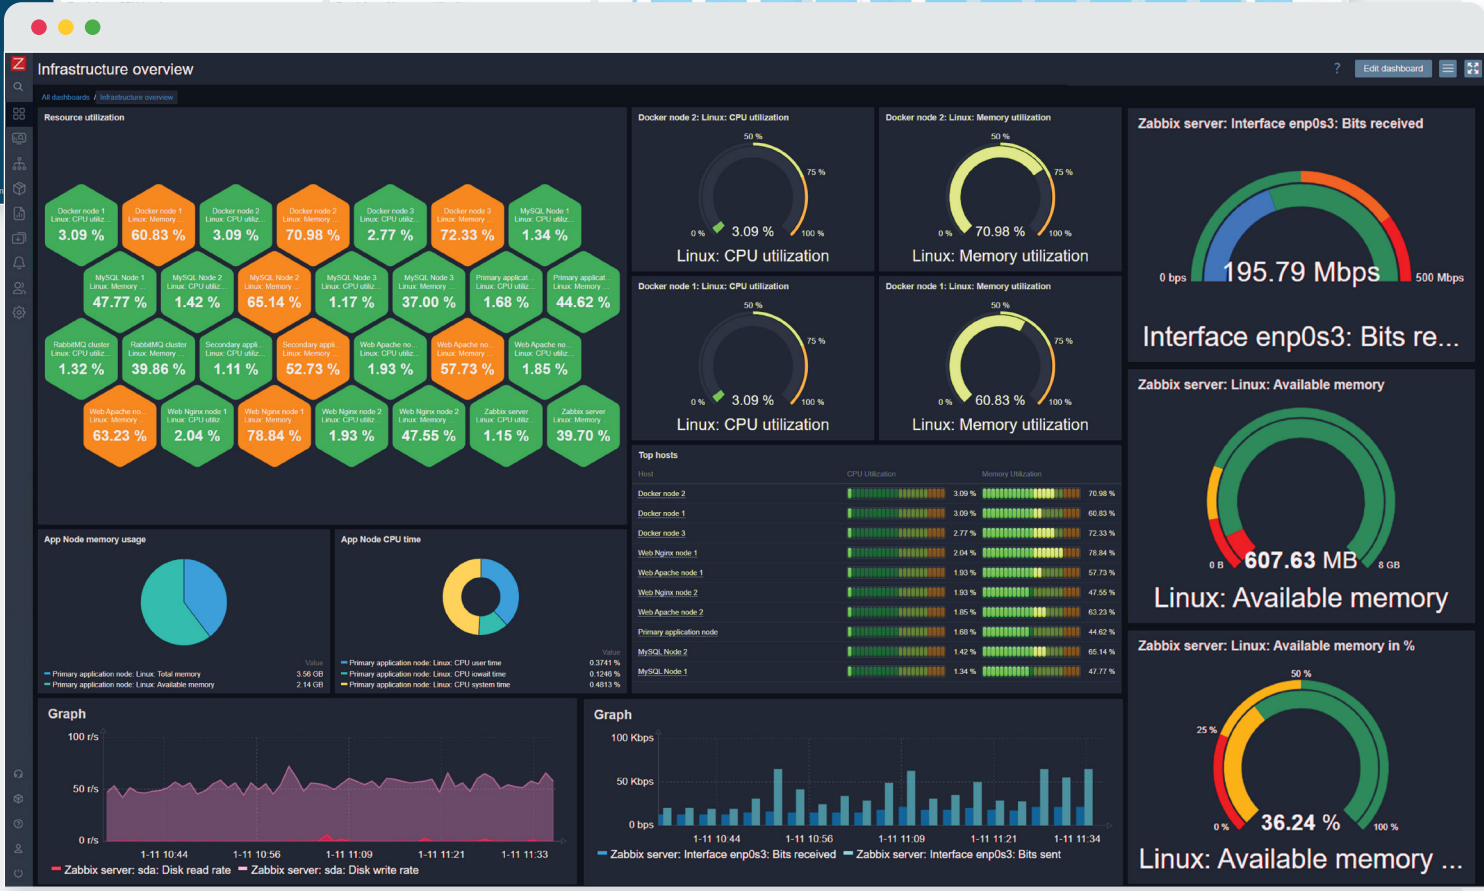

Network maps

Geographical maps

Reports

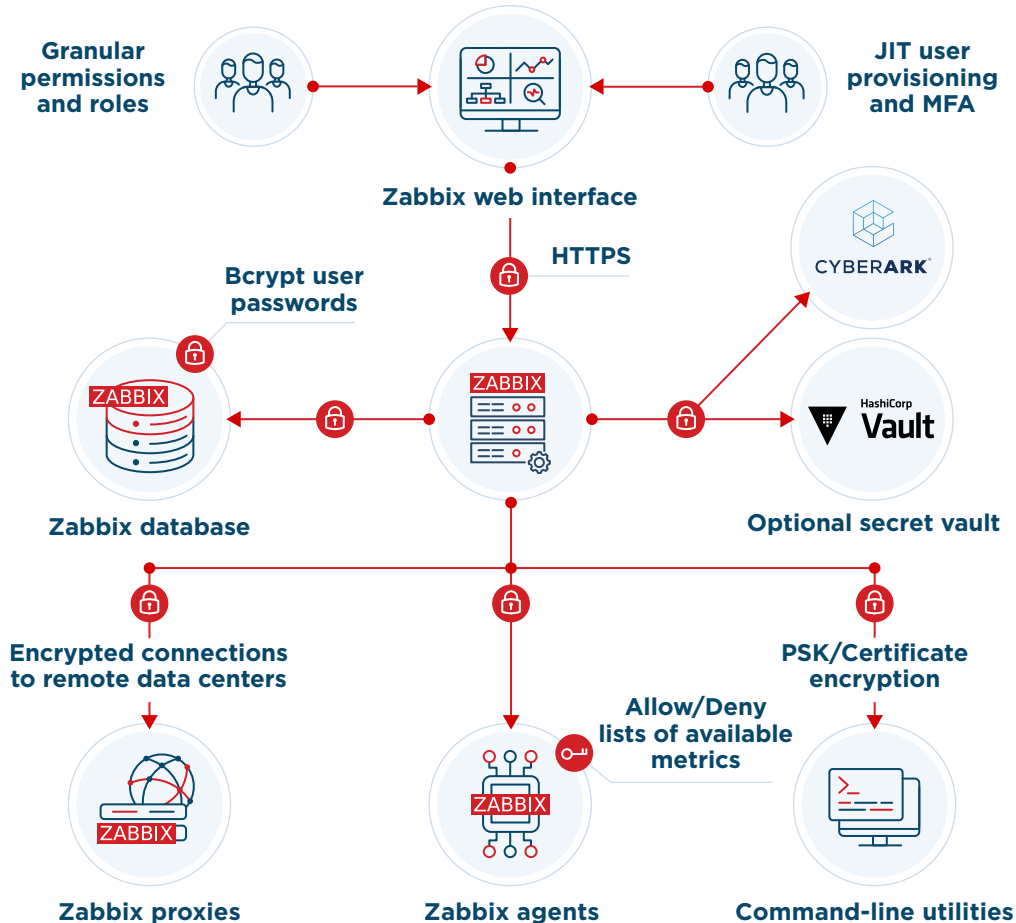

Display and track your infrastructure component states on geographical and network maps. Receive daily, weekly, monthly, or yearly reports and get a periodic overview of your infrastructure.

# Security

Zabbix provides a robust set of internal permission and compliance mechanisms as well as TLS encryption support for incoming and outgoing connections.

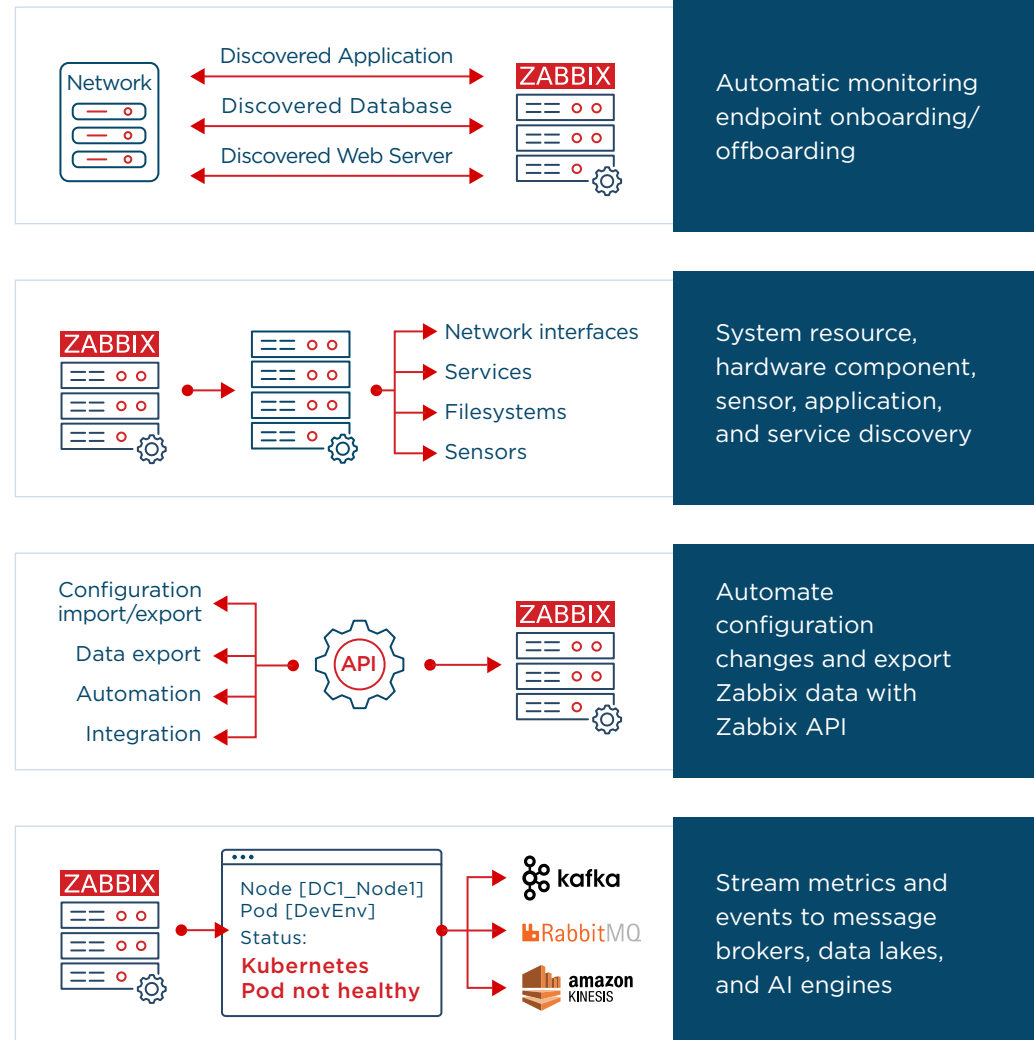

hackerone

What's more, we invest heavily in security by regularly testing our product against the world's top hackers.

# Automation

Automate your monitoring endpoint onboarding and offboarding workflows, automatically discover, filter, and start monitoring existing resources, and integrate Zabbix with third-party vendors.

# Zabbix Cloud

The ideal platform for efficiency and innovation, Zabbix Cloud has been created to give you all the Zabbix features that our users depend on, but with the kind of improved flexibility that comes with easier deployment and management. It scales easily to fit changing requirements, automatically upgrades to the latest version, and keeps users informed around the clock.

Zabbix Cloud reduces costs, eliminates downtime, and makes it easy to deploy additional Zabbix instances with just a few clicks. You can count on having a wide selection of data collection and processing approaches to choose from, and all Zabbix Cloud instances are configured for the best possible data collection and processing performance.

Zabbix Cloud is available to **try for free** with no risk involved, and there are multiple compute tiers available for purchase when your trial ends.

## 5 regions

Choose the data center that best fits your organization

## 7 tiers

Pick the tier that's right for your budget and monitoring requirements

## Optimal performance

Every Zabbix Cloud instance is tuned to ensure the best possible performance

## 24/7 uptime

Round-the-clock uptime makes sure that Zabbix keeps you and your team informed at all times

# Zabbix Cloud key benefits

## Scale as you go

Seamlessly rescale your Zabbix Cloud instance to fit your requirements

## 24/7 uptime

Zabbix makes sure that your Zabbix Cloud instances are always available

## Zabbix on demand

Deploy a new Zabbix instance with just a few clicks

## Stay up to date

Automatically get your Zabbix instance upgraded to the latest version

## Monitor anything

Choose from a wide selection of data collection and processing approaches

## Maximize performance

Zabbix Cloud instances are configured for the best possible data collection and processing performance

Try Zabbix Cloud for free,  
then sign up for the tier that suits you best

Zabbix Cloud is available to try for free with no risk involved.

After you sign up, your first payment is calculated as the number of full days (including the day you sign up) until the end of the current month. Unless you sign up on the first day of the month, your first payment will be smaller than the typical monthly fee. You will be charged the full amount starting from the following month.

# Zabbix Cloud vs Zabbix On-Premise

## Features

	Zabbix Cloud	Zabbix On-Premise
	Free trial available	Download and install
Automatic upgrade to the latest version	✓	—
Deployable with just a few clicks	✓	—
No additional configuration required	✓	—
Agent and agentless metric collection	✓	✓
Out-of-the-box integrations with industry-leading ITSM and messaging software	✓	✓
Over 250+ official templates for the most popular software and hardware vendors	✓	✓
Requires no internet access	—	✓
Customize or extend your Zabbix deployment by modifying Zabbix source code	—	✓
Free option available after trial	—	✓
