

# Alexei Vladishev

## Zabbix CEO, Founder

---

A native of Riga, Latvia, Zabbix CEO and Founder Alexei Vladishev developed a strong passion for math and computers at an early age, starting his programming journey on his ZX Spectrum computer while still in school. This led him to pursue a degree in Computer Science at the University of Latvia, where he deepened his technical expertise.

While working as a System Administrator at Deutch-Lettische Bank and a System Architect at Nomad Software, Alexei was involved in the implementation and development of a card payment transaction system for financial industry clients. It was at this time that he first recognized the need for a tool that would automate his work and prevent him from needing to constantly check applications manually.

From its humble beginnings as a simple script, Alexei's tool gradually grew into Zabbix SIA, the company he created in 2005. The company has since grown into a multinational business, with over 250 partners worldwide and users in all countries.

Alexei takes on many roles within Zabbix, including company operations and product management, but he still gets the most joy out of solving technical and design challenges.

**“Zabbix was born out of the belief that monitoring should be powerful yet accessible to all. Our dedicated team and vibrant community, have tirelessly contributed to the development of a robust monitoring solution that empowers organizations worldwide. We are committed to continuously innovating and evolving our product to meet the ever-changing needs of our customers.”**
