

Kodai Terashima

Zabbix Japan CEO

Kodai Terashima is the CEO of Zabbix Japan. He was introduced to Zabbix in 2005, when he was working as a system integrator. The tool suited his needs so well that he created Japan's first Zabbix community, translating web interfaces and documents, sharing information on the forum, and creating and sending patches.

The depth of his passion got him noticed, and in 2011 Zabbix reached out to him with an offer to work as an engineer at Zabbix in Latvia. He made the most of the assignment and became the CEO of Zabbix Japan in 2012. He is also the author of "Zabbix Integrated Monitoring (Practice)".

"At Zabbix Japan, we take immense pride in our product's impact on the Japanese market, transforming businesses and delivering unparalleled visibility, reliability, and actionable insights. We are devoted to upholding the highest quality standards, enabling our users in Japan and beyond to confidently rely on Zabbix to optimize their operations and achieve their goals."
