

ZABBIX

QUICK INTRODUCTION

About us

Our story began with a small group of passionate individuals who challenged the status quo of monitoring solutions. Led by Alexei Vladishev and driven by a shared vision, they created an open-source solution that would allow organizations of all types and sizes to run their IT infrastructures flawlessly.

Through countless hours of development, collaboration, and unwavering commitment, Zabbix emerged as an industry trailblazer by offering a robust, scalable, and flexible monitoring solution that continues to transcend boundaries while setting new standards for transparency and value.

Zabbix at a glance

Founded:
2005, by
Alexei Vladishev

Headquarters:
Riga, Latvia

Global offices:
Latvia, Japan,
United States,
Mexico, Brazil

Global partners:
260 (and counting)

Our products

Zabbix is an all-in-one, open-source monitoring solution that automatically detects threats and issues and then either notifies you or fixes them by itself – freeing up your engineers, improving the quality of your services, and making your business more efficient.

Instead of subscribing to multiple solutions for monitoring infrastructure components, Zabbix can be your “one-stop shop” when it comes to keeping track of your entire network. Zabbix lets you monitor anything – from physical and virtual servers or containers to network infrastructure, applications, and cloud services.

Zabbix Cloud provides all the Zabbix features that our users depend on, but with improved flexibility thanks to easier deployment and management. It scales easily to fit changing requirements, automatically upgrades to the latest version, and keeps users informed around the clock, while also reducing costs, eliminating downtime, and making it easy to deploy additional Zabbix instances with just a few clicks.

What else do we offer?

We offer a wide range of professional services that are designed to fit your unique business requirements. No matter its function, every Zabbix professional service has the same overall goal in mind - providing you with the most effective solution in the shortest time possible.

Our information security management system has been audited and found to meet international standards

We were named the April 2020 Customers' Choice for IT Infrastructure Monitoring Tools on Gartner Peer Insights

Our Values

Our values are best reflected in our people – the colleagues we meet virtually and in person every day and who we can always rely on for support, regardless of time or distance. Our teammates are scattered across the globe, coming from different countries and cultures, having different interests, and speaking a wide variety of languages, but we all have one thing in common – our dedication to the global Zabbix community and our belief in the solutions we create.

This dedication is why we are always able to find common ground with each other.

We are all Zabbix!
