PREMIUM PARTNER

INDUSTRY USE-CASE

Telecom Provider

A regional telecom/ISP looking to modernize its monitoring stack explores using Zabbix as a powerful and FREE alternative to big-box proprietary monitoring solutions.

Problem

- Increases to big box monitoring solutions
- Non-traditional IT equipment
- Small budget, large reach

Challenges

- Looming software renewals
- Core monitoring challenges
- Compliance
- Tight timelines

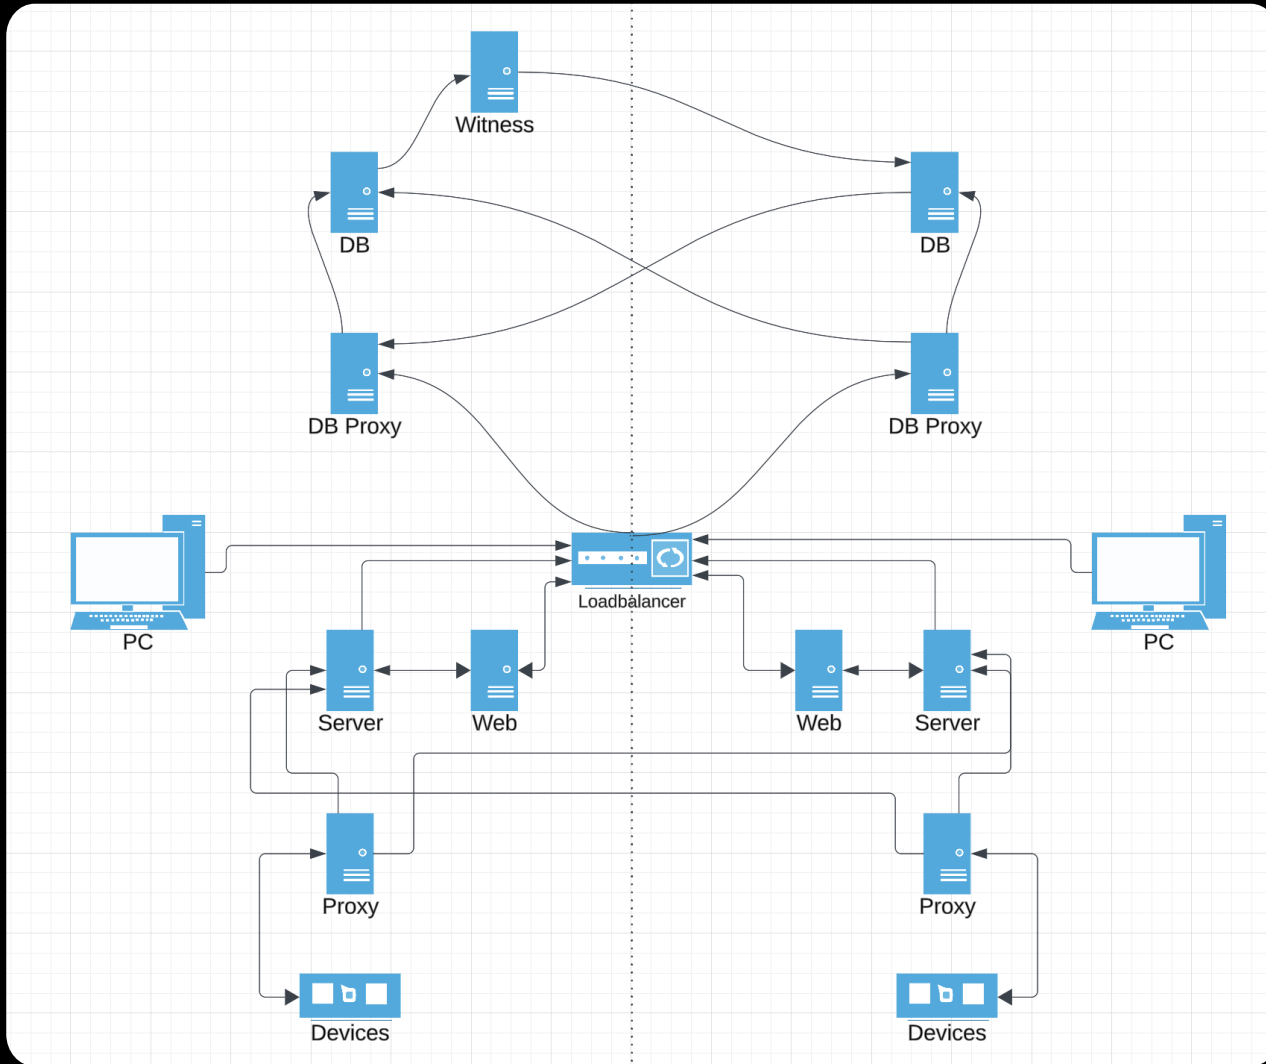

Solution

- Highly Available DB/Server across large geo
- 1-month implementation
- Monitoring Enhancements

Outcome

- free implementation
- Incredible multi-year ROI
- Flexible, and in control
- Solving future problems, not just today's problems

Overview

Thoughtful Architecture

- PostgreSQL
- TimescaleDB
- PG Pool/Bouncer
- 3TB Database Size
- Multiple Datacenters
- Wide Geo

Specialized Use-cases

Door Monitoring

- Custom SNMP Traps
- Alerting on Open Doors
- Compliance Reporting

Weather Prediction

- Weather Data Integration
- Equipment Tolerance Alerts
- Very useful for preparation

SLA Monitoring

- Shared Responsibility
- Integration with SNOW
- Regulatory Reporting

ATS: Solving the problems others can't.
