

Zabbix Cloud: All the Power, None of the Overhead

Vladimirs Elsters, Head of Software Development, Zabbix

OCTOBER 8 • 10, 2025
RIGA • LATVIA

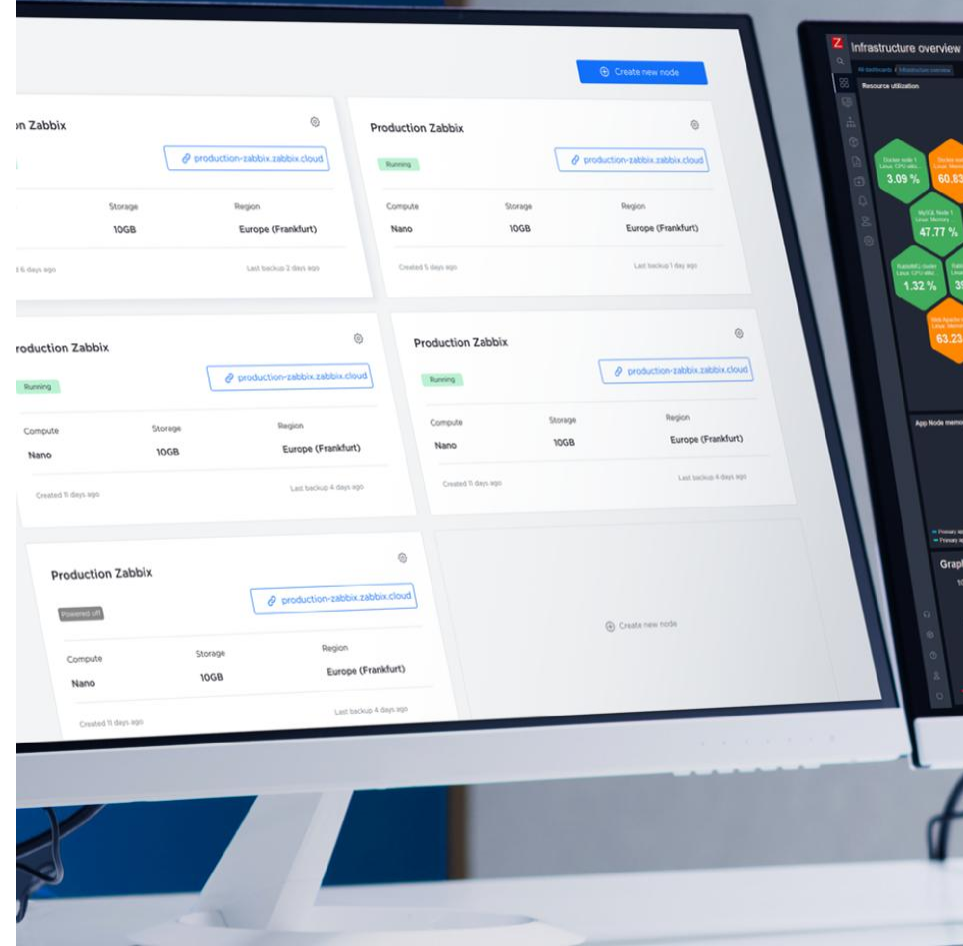

What if...

maintenance of your Zabbix instances was no longer on your to-do list, so you could focus on monitoring itself?

Zabbix Cloud

You keep control of the software, we run the platform

zabbix.com/cloud

Zabbix Cloud SaaS platform

Zabbix on demand

Deploy a new Zabbix instance with just a few clicks

24/7 uptime

Zabbix team makes sure that your instances are always available

Monitor anything

Choose from a wide selection of data collection and processing approaches

Scale as you go

Seamlessly rescale your Zabbix Cloud instance to fit your needs

Stay up to date

Automatically get your Zabbix instance upgraded to the latest version

Maximize performance

Instances are configured for the best possible data collection and processing performance

20%

Monthly growth

Trusted deployments

User base is expanding steadily since launch

Feedback

Highlights: no infra overhead, fast time-to-value and predictable pricing

User feedback

“ The biggest upsides to Zabbix Cloud are upgrades maintenance. They manage the upgrades between database maintenance for you... I switch to Zabbix already so glad to just not have to worry about that

Zabbix Cloud User · Reddit

“I switched to it shortly after it came out. So nice not to be able to stop managing another server/database. We use one on-prem proxy.”

Zabbix Cloud User · Reddit

Value Accessible to Anyone

Zero Infra Overhead

Focus on monitoring, not maintenance

All the Power of Zabbix

Full feature set, templates, and flexibility you know and like

Hybrid Monitoring

Combine cloud and on-prem in one seamless setup

Faster Time-to-Value

Deploy, import templates, monitor in minutes

Scale Easily

Upgrade NVPS, add storage, grow without migration

Predictable Costs

Capacity-based pricing, no per-host host surprises

Stability You Can Trust

Proven reliability, automatic backups, consistent performance

Security & Compliance

Encryption, audits, ISO controls

Power Accessible to Anyone

Small Tier - Big Value

- 250 NVPS
- ~300 hosts with 50 items @ 1 min interval

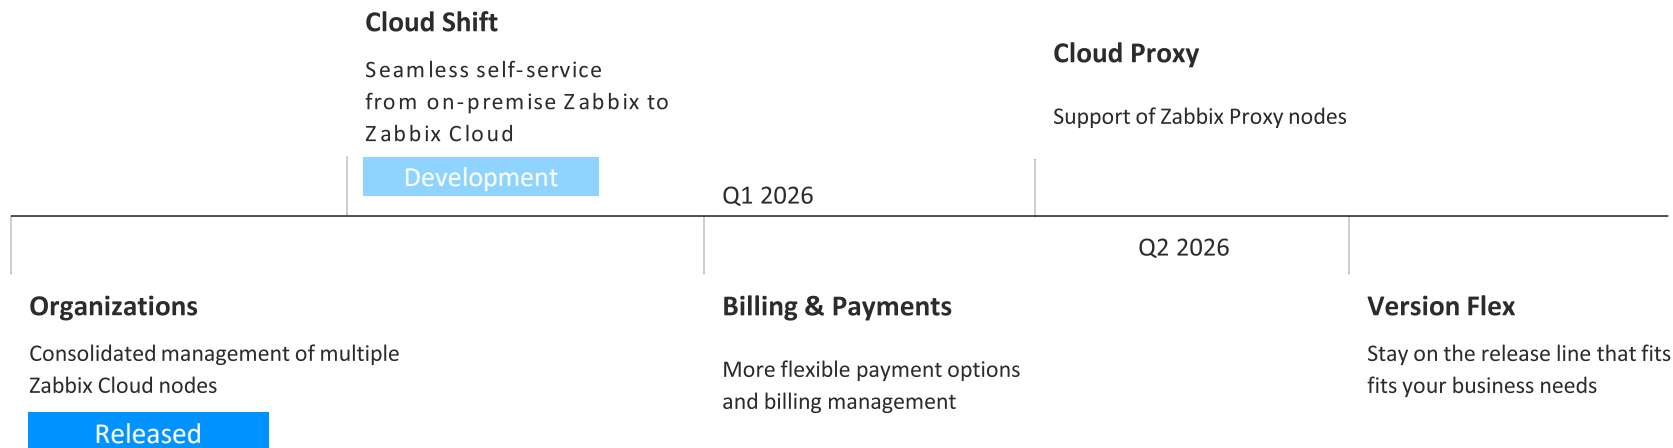

Fixed price \$250 a month, that's enterprise-grade monitoring without infrastructure headaches. That's what we mean by power accessible to anyone

Large Tier - 10x capacity

- 2500 NVPS
 - Scale up to ~3000 hosts
- Same product, same features — just scaled

	Nano	Micro	Small	Medium	Large	xLarge	2xLarge
? NVPS (New Values Per Second)	50	100	250	1000	2500	5000	10000
? Starting from	\$ 50	\$ 100	\$ 250	\$750	\$ 1875	\$ 2500	\$ 5000

Roadmap insights

Shift to Cloud. Keep the Power.
