LucasArts

PRINTING

LETTERHEADS PLUS (132) Design/print custom letterheads, envelopes, labels to Epson/IBM compatible printers.

EZ-FORMS (119) Create custom forms. Easy, powerful.

ON-SIDE (121) New! Print sideways with custom fonts. Menu-driven.

CITYDESK (123) Desktop publishing for 2 column newsletters.

MR. LABEL (124) Most versatile & powerful label printing program.

ADDRESS-O-MATIC (127) Grabs names and addresses from letters and automatically prints envelopes.

IMAGEPRINT (128) Remarkable letter quality printing on a 9 pin dot matrix printer.

BANNER MAKER (130) Create signs and banners with multiple fonts & styles.

COLUMNAR PRINTING UTILITY (133) Prints proportionally justified text files in 1 to 3 columns.

GAMES

CRIME LAB (279) Great, unique graphic murder mystery game. CGA or EGA.

CAPTAIN COMIC (280) Commercial quality arcade game. Excellent! EGA or VGA.

DRACULA IN LONDON (278) Super graphics

UTILITIES

LAPTOP GASGUAGE (460) Monitors laptop battery usage. Know when to recharge.

POINT-SHOOT BACKUP/RESTORE (401) Superior hard disk backup. CGA or EGA.

QUICKCACHE (443, 444) (2 disks) Disk caching speeds up your PC. Best we've seen!

BAKER'S DOZEN (406) Powerful package of 14 utilities from Jim Button. Top rated.

FLU-SHOT + (411) New! Effective protection against virus programs.

CGA SIMULATOR (433) Run most CGA programs on Hercules compatible monochrome cards.

HARD DISK UTILITIES (437) Very useful set of hard disk utilities.

EGA FONTS (441) More than 50 fonts to make your EGA shine.

CATDISK (452) Easy, menu-driven disk cataloging system.

SPACE MAKER (467) Data compression package to save disk space.

BEST BATCH UTILITIES (473) 25 programs put power in your batch files

MENUS and DESKTOP

POWER MENU (702) Excellent, easy menuing program. Needs hard disk.

DATABASE

dLITE (1031) Amazing dBASE multi-utility incl cut & paste, and much more

FILE EXPRESS 4.xx (1002-1003) (2 disks) Easy, powerful database. PC-Magazine said it "performs like a thoroughbred."

dPROG (1022) Fantastic dBASE III autoprogrammer writes all codes for you.

WAMPUM (1006, 1007) (2 disks) Superb, full-featured dBASE III clone. Requires 512K, hard disk.

dFLIPPER (1025) New! Directly edit dBASE & compatible files from DOS.

PC-FILE + 2.9 (1009-1011) (3 disks) New version. Jim Button's relational database masterpiece

CREATIVITY

CREATIVITY PACKAGE (3000-3002) (3 disks) Unique, 3-phase pkg. Computer brainstorming unleashes your creativity.

IDEA TREE (3003) Unique thinking tool & info manager Gain control of thoughts with graphic display of ideas Top honors.

PROGRAMMING

A86 and D86 (1403-1404) (2 disks) Finest macro assembler & debugger. Lightening fast. Rave reviews.

COMMUNICATIONS

PROCOMM (1700, 1701) (2 disks) Newest. All features, menu-driven. Top rated.

TELEDISK (1713) NEW! Converts entire diskette into a compressed file for faster transmission.

EDUCATION & TUTORIALS

EX-dBASE TRAINER (321) Great dBASE and dBXL trainer.

WORDPERFECT LEARNING SYSTEM (353, 354) for 4.2 **(355, 356)** for 5.0.

BASIC PRIMER (330) Great Basic tutor. Requires CGA, color monitor

TUTOR (302) Complete interactive DOS and computer tutorial.

EASY DOS (305) Two great programs make using DOS very easy.

PC-FASTYPE (311) The very best interactive typing instructor. Needs CGA or EGA.

THE PRESIDENTS (341-342) (2 disks) Super biography & quiz system on all the U.S. presidents.

SPANISH TUTOR (351) 3 powerful programs to help you learn Spanish.

DOWNLOAD QUAKE

We split Quake Shareware into files that will fit on 1.44 mb floppies so you can copy each file to a disk for backup purposes, or to give to a friend who doesn't have internet access (just in case you need someone to beat on in deathmatch). All seven disks are required to install Quake.

** Getting the full Shareware Version 1.06:
The filenames for the 7 disks are: qsw106_1.zip to qsw106_7.zip.
Alternatively you can download one huge .zip file (8.54 megs) called quake106.zip. Regardless of which file(s) you choose to download, the installation process is the same for both.
1. Copy the/all .zip file(s) to a \temp directory.
2. Unzip the file(s).
3. Run the file 'install.bat' from the \temp directory and follow the directions from there.

** Getting the Patch to upgrade existing Shareware or Registered v1.01 to v1.06: If you already have v1.01 Shareware OR Registered, you can download the patch 1.01 to 1.06 here. To patch your existing version, you should copy this file (q101-106.zip) to your \quake directory. Then upzip it, and answer 'y' to overwrite the existing file 'quake.exe'. Once it is finished unzipping,

From: torvalds@klaava.Helsinki.FI (Linus Benedict Torvalds)
Newsgroups: comp.os.minix
Subject: What would you like to see most in minix?
Summary: small poll for my new operating system
Message-ID:
Date: 25 Aug 91 20:57:08 GMT
Organization: University of Helsinki

Hello everybody out there using minix -

I'm doing a (free) operating system (just a hobby, won't be big and
professional like gnu) for 386(486) AT clones. This has been brewing
since april, and is starting to get ready. I'd like any feedback on
things people like/dislike in minix, as my OS resembles it somewhat
(same physical layout of the file-system (due to practical reasons)
among other things).

I've currently ported bash(1.08) and gcc(1.40), and things seem to work.
This implies that I'll get something practical within a few months, and
I'd like to know what features most people would want. Any suggestions
are welcome, but I won't promise I'll implement them :-)

FREE SOFTWARE

ONLY $79.99

redhat

...those new to the term "free software" assume it is referring to the price. Oldtimers must then launch into an explanation, usually given as follows: "We mean free as in freedom, not free as in beer." At this point, a discussion on software has turned into one about the price of an alcoholic beverage...

Between meetings that week, I was still focused on the need for a better name and came up with the term "open source software."

Christine Peterson
Coined the term "open source"

mirrors: **Austria China Croatia**. **Denmark Greece Hungary Italy Spain U.S. U.K.**

The E-mail addresses on this and other pages of the opensource.org site are not to be used for unsolicited mass mailing ("spam") of any kind, commercial or otherwise.

Open Source: Software Gets Honest

Open-source software is an idea whose time has finally come. For twenty years it has been building momentum in the technical cultures that built the Internet and the World Wide Web. Now it's breaking out into the commercial world, and that's changing all the rules. Are you ready?

This site offers **several complementary views** of the open-source phenomenon. You can read a brief introduction, a techie/hacker's case, a businessperson's case, and a customer's case. Still not convinced? Then read some third-party case studies.

Those of you who regard Microsoft products as the acme of computing can even read the Halloween Documents, two annotated Microsoft internal white papers on open source.

FSF sues Cisco over Linksys open source code

The Free Software Foundation has sued Cisco because it doesn't think it has met its obligation to provide source code for the open source software used in Linksys routers

The Free Software Foundation has sued Cisco (PDF) over the open source code used by its Linksys division. It's essentially a copyright violation case. The FSF says:

> Most of these programs are licensed under the GNU General Public License (GPL), and the rest are under the GNU Lesser General Public License (LGPL). Both these licenses encourage everyone, including companies like Cisco, to modify the software as they see fit and then share it with others, under certain conditions. One of those conditions says that anyone who redistributes the software must also provide their recipients with the source

Cisco settles lawsuit with Free Software Foundation

The FSF will continue to monitor Cisco's compliance with open source licenses in Linksys products

GPL passes acid test in German court

By   -   September 24, 2006   👁 503

[f] [X] [P] [WhatsApp] [in] [reddit] [✉]
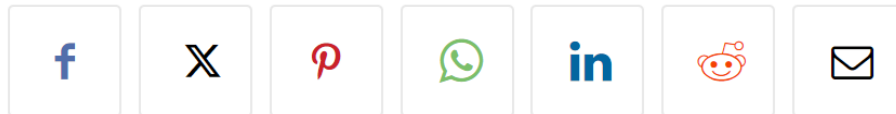

Author: Mayank Sharma

In a landmark victory for the GPL license, a civil court in Germany has ruled against D-Link Germany GmbH for violating the terms of the most popular free software license. The lawsuit was filed by Harald Welte, a respected Linux hacker who tracks and eliminates illegal use of software protected by the GPL through his gpl-violations.org project. In a brief email exchange, Welte explains the nature of the violation and how he went about collecting evidence.

"Linux is a cancer that attaches itself in an intellectual property sense to everything it touches. That's the way that the license works."

WP Engine is not WordPress

It has to be said and repeated: *WP Engine is not WordPress*. My own mother was confused and thought WP Engine was an official thing. Their branding, marketing, advertising, and entire promise to customers is that they're giving you WordPress, but they're not. And they're profiting off of the confusion. WP Engine needs a trademark

To exit full screen, press and hold `Esc`

What WP Engine gives you is not WordPress, it's something that they've chopped up, hacked, butchered to look like WordPress, but actually they're giving you a cheap knock-off and charging you more for it.

This is one of the many reasons they are a cancer to WordPress, and it's important to remember that unchecked, cancer will spread. WP

advertising, and entire promise to customers is that they're giving you WordPress, but they're not. And they're profiting off of the confusion. WP Engine needs a trademark

I stayed.

By L. Jeffrey Zeldman   4 October 2024   23 Comments

My insight into corporate legal disputes is as meaningful as my opinion on Quantum Mechanics. What I do know is that, when given the chance this week to leave my job with half a year's salary paid in advance, I chose to stay at Automattic.

Listen, I'm struggling with medical debts and financial obligations incurred by the closing of my conference and publishing businesses. Six months' salary in advance would have wiped the slate clean. From a fiduciary point of view, if nothing else, I had to at least consider my CEO's offer to walk out the door with a big bag of dollars.

But even as I made myself think about what six months' salary in a lump sum could do to help my family and calm my creditors, I knew in my soul there was no way I'd leave this company. Not by my own choice, anyway.

LICENSING IS HARD —

Redis' license change and forking are a mess that everybody can feel bad about

Cloud firms want a version of Redis that's still open to managed service resale.

KEVIN PURDY - 4/1/2024, 6:47 PM

DATABASES

Redis 'returns' to open source with AGPL license

New plan may remain too restrictive for some developers

Lindsay Clark   Thu 1 May 2025 // 16:15 UTC

Redis, the company behind the popular value-key database of the same name, has returned its main system to an open source license, although the move failed to satisfy some critics.

Adding the GNU Affero General Public License (AGPL) as an additional licensing option for Redis, starting with Redis 8, the business said it is moving to a licensing model approved as open source by the Open Source Initiative (OSI) – as the Server Side Public License (SSPLv1) it switched to in March last year has remained outside the accepted definition of open source software.

Majority of Redis users considering alternatives after less permissive licensing move

NIGHTMARE SUPPLY CHAIN ATTACK SCENARIO —

What we know about the xz Utils backdoor that almost infected the world

Malicious updates made to a ubiquitous tool were a few weeks away from going mainstream.

DAN GOODIN - 4/1/2024, 7:55 AM

On Friday, a lone Microsoft developer rocked the world when he revealed a backdoor had been intentionally planted in xz Utils, an open source data compression utility available on almost all installations of Linux and other Unix-like operating systems. The person or people behind this project likely spent years on it. They were likely very close to seeing the backdoor update merged into Debian and Red Hat, the two biggest distributions of Linux, when an eagle-eyed software developer spotted something fishy.

"This might be the best executed supply chain attack we've seen described in the open, and it's a nightmare scenario: malicious, competent, authorized upstream in a widely used library," software and cryptography engineer Filippo Valsorda said of the effort, which came frightfully close to succeeding.
