

The graphic features a dark blue background with a pattern of glowing, curved lines of dots in shades of blue and purple, creating a sense of motion and data flow. The text is centered and uses a clean, sans-serif font. The word 'ZABBIX' is highlighted in a red box, while the rest of the text is white. The year ''26' is positioned to the right of 'ZABBIX'.

**ZABBIX** '26

# ZABBIX CLOUD

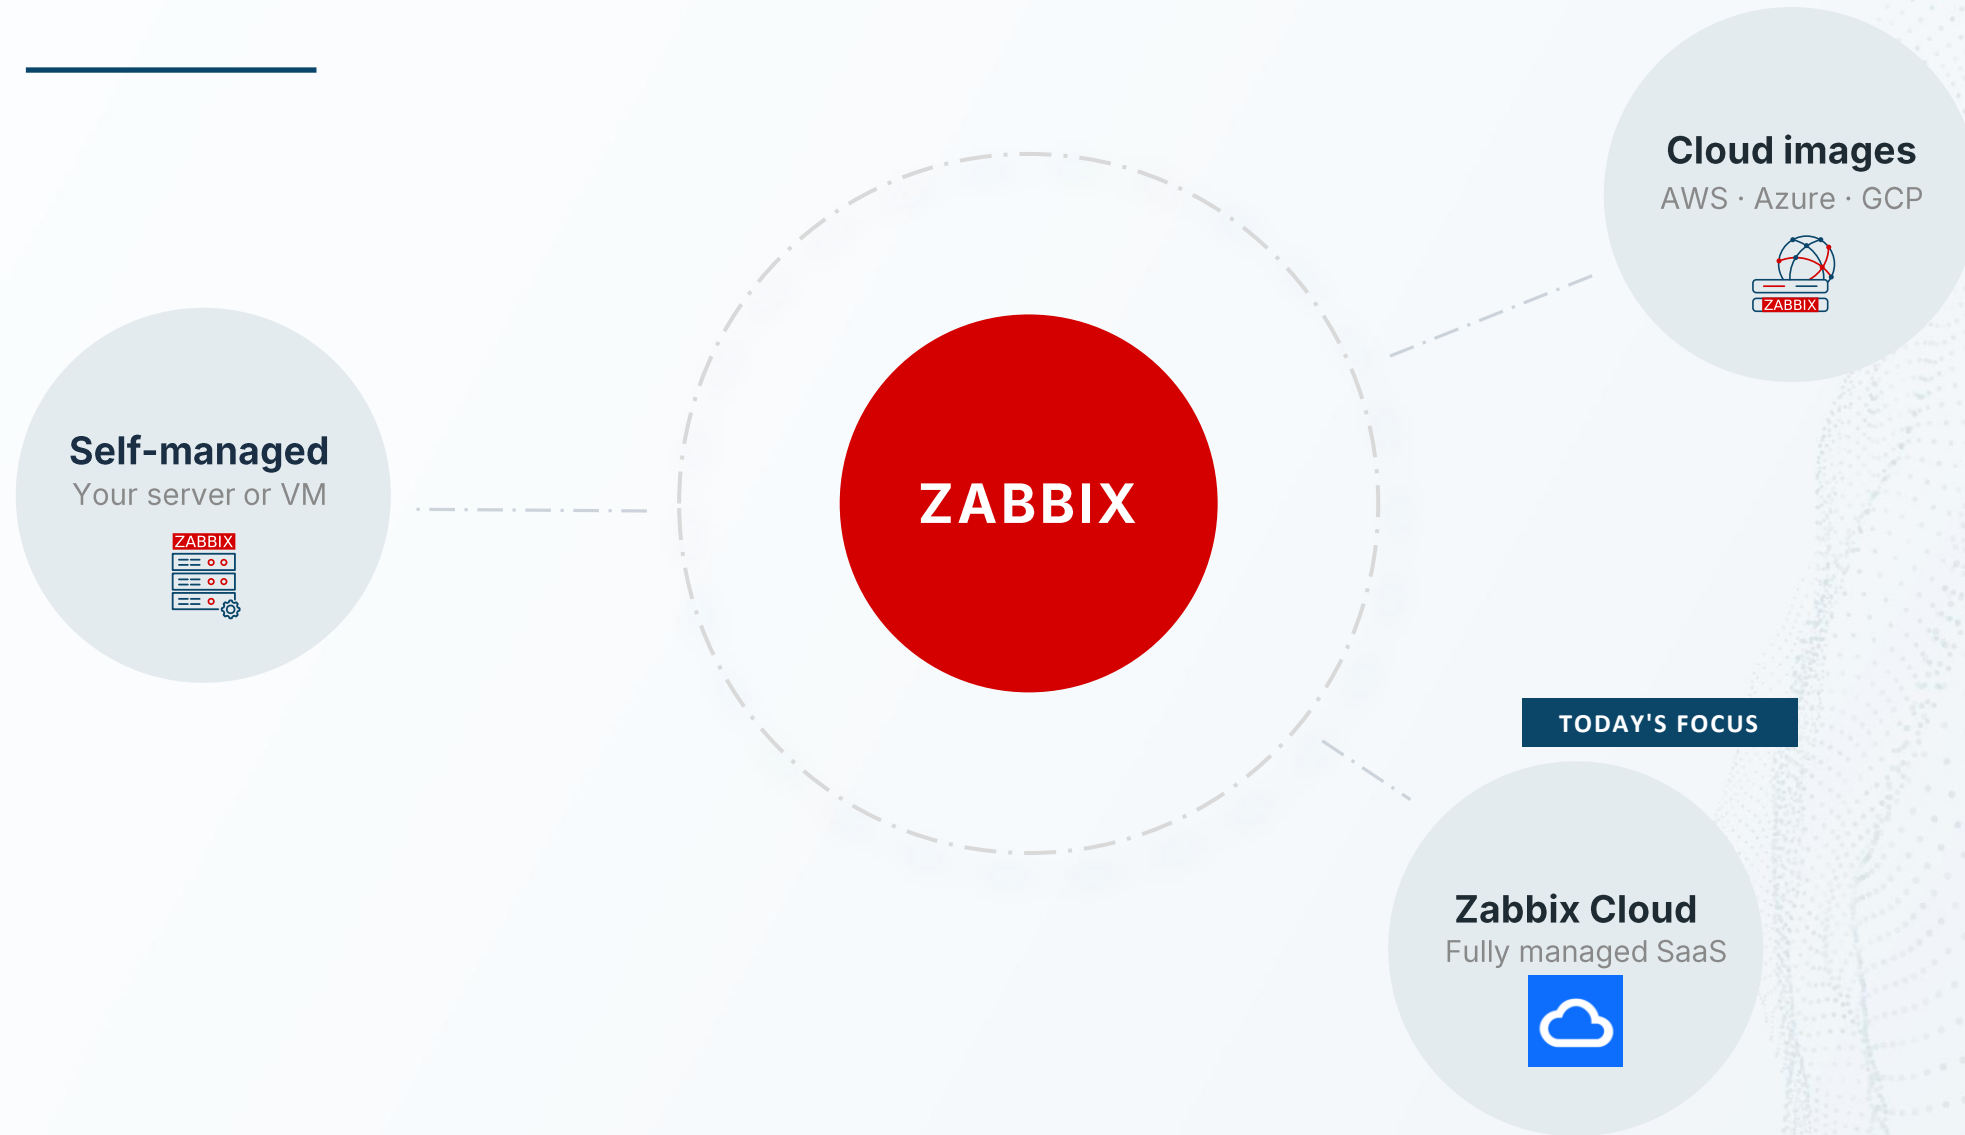

Your monitoring works, we run it

---

**Vladimirs Elsters**

Head of Software Development

# Deployment ecosystem

# Self-managed installation

## HOW IT WORKS

### Your server

Physical or VM

### OS + Database

You install & configure

ZBX

### Zabbix

Manual install & tune

### Harden & configure

Security, backups, performance

### Ongoing maintenance

Updates, patches, backups

## WHAT IT TAKES

### ONE-TIME SETUP

#### Hours

Zabbix installs fast - not the hard part

#### Days

Hardening, backups, security config & production readiness

### ONGOING OWNERSHIP

#### Scheduled

Monthly patches, quarterly upgrades & security audits

#### Unplanned

Incidents, hardware failures, emergency scaling

**100%**  
on your team

# Cloud images

## HOW IT WORKS

### Cloud provider

AWS, Azure, GCP

### Pre-build image

OS + Zabbix pre-installed

### Zabbix ready

Tuned config included

### Harden & configure

Security, backups, performance

### Ongoing maintenance

Updates, patches, backups

## WHAT IT TAKES

### ONE-TIME SETUP

#### Minutes

Pre-build AMI, Zabbix ready instantly

#### Hours

Backups, security config & production readiness

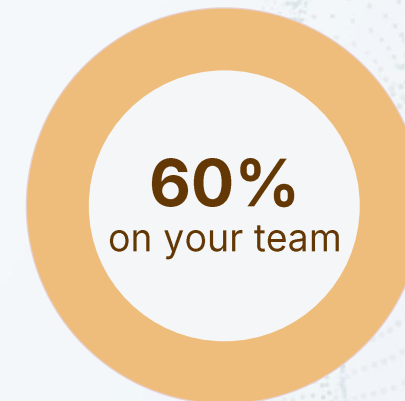

### ONGOING OWNERSHIP

#### Scheduled

Monthly patches, quarterly upgrades & security audits

#### Unplanned

Incidents, cost spikes, cloud changes, emergency scaling

# Zabbix Cloud

## HOW IT WORKS

### Sign up

Choose tier & name

### Automatic provisioning

Zabbix config, backups

### Zabbix ready in 5 min

Secure, performance optimized

### Zabbix team maintains

24/7 platform maintenance

## WHAT IT TAKES

### ONE-TIME SETUP

#### 5 Minutes

Sign-up, choose tier, backups frequency and storage amount

#### 0 seconds

Zabbix Cloud handles all configuration, hardening, backups, tuning

### ONGOING OWNERSHIP

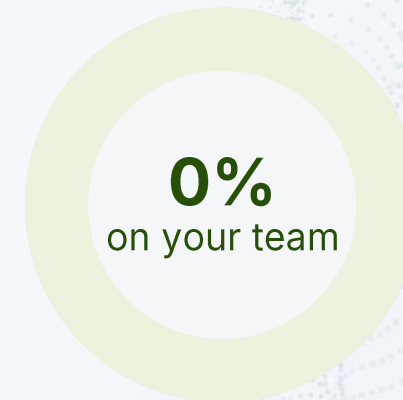

#### 0 seconds

Monthly patches, quarterly upgrades & security audits

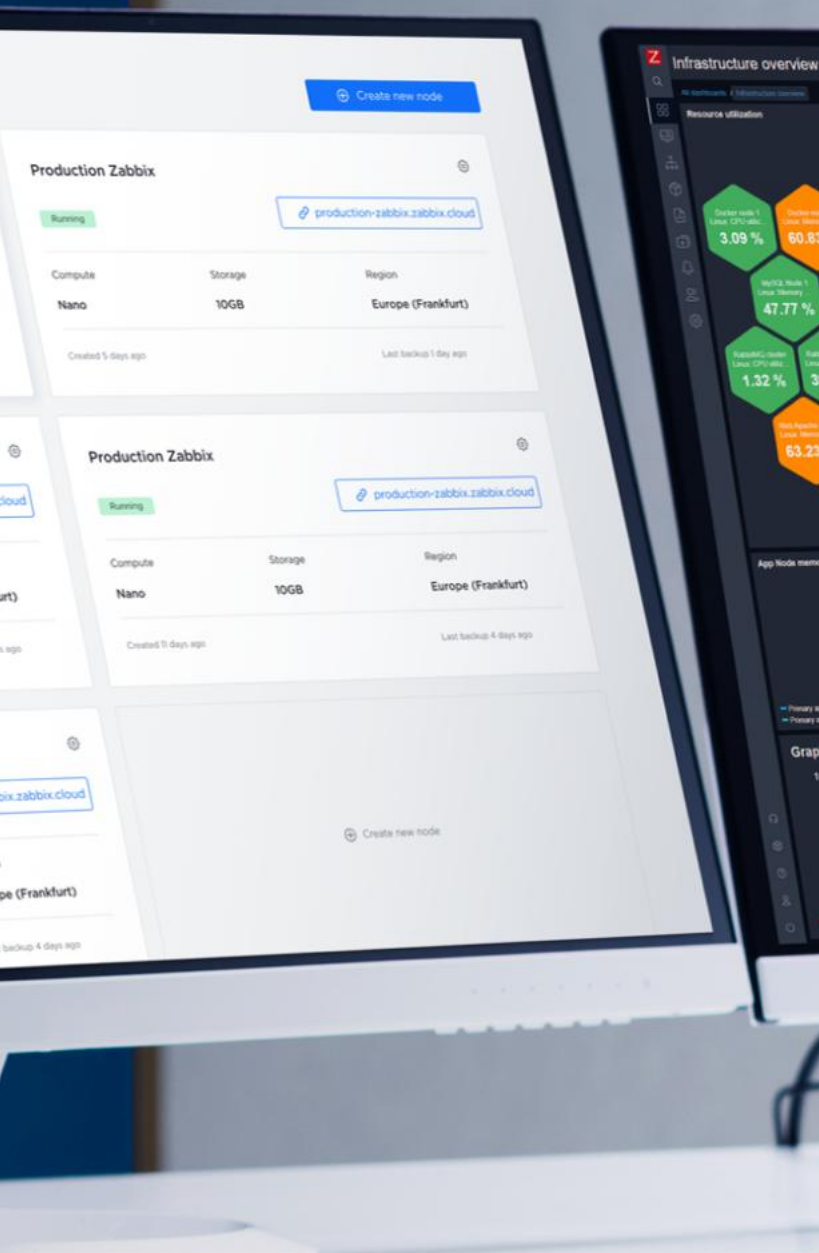

#### 0 seconds

Incidents, cloud changes, emergency scaling

on your team

# Zabbix Cloud platform

## Zabbix on demand

Deploy a new Zabbix instance with just a few clicks

## Security & backups

Encryption, audits and automatic backups

## Stay up to date

Automatically get your Zabbix instance upgraded to the latest version

## 24/7 uptime

Zabbix team makes sure that your instances are always available

## Scale as you go

Seamlessly rescale your Zabbix Cloud instance to fit your requirements

## Platform support

Zabbix team handles all platform maintenance, incidents and emergencies

## WHAT ZABBIX CLOUD UNLOCKS

---

# Now your team can focus on monitoring

No more servers and patches.  
No more maintenance, backups, and  
security audits.

### Faster time to value

---

Deploy and start monitoring immediately - no infrastructure setup, no waiting

### Predictable costs

---

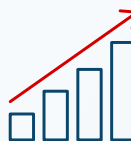

Transparent capacity-based pricing, no per-host surprises

### Hybrid monitoring

---

Combine cloud and on-prem in one seamless setup

### Scale as you grow

---

Add NVPS and storage as you grow  
Run multiple nodes or organizations

## TRUSTED BY THE COMMUNITY

---

**20%**  
monthly growth

User base expanding steadily since launch

### Trusted deployments

User base is expanding steadily since launch

### Community

Community endorsements and trial conversions are increasing

### Feedback

Highlights: **no infra overhead, fast time-to-value and predictable pricing**

### Product signals

More features suggestions and users ideas

“

*The biggest upsides to Zabbix Cloud are upgrades and maintenance. They manage the upgrades between versions and database maintenance for you... I switch to Zabbix Cloud and I'm already so glad to just not have to worry about that anymore.*

---

Zabbix Cloud User · Reddit

“

*I switched to it shortly after it came out. So nice not to have to stop managing another server/database. We use one on-prem proxy.*

---

# Roadmap insights

## Annual subscription

Monthly or annual subscription options

Live in June

## Billing account

More flexible billing administration

Q3 2026

Q4 2026

## Audit Log

Complete, filterable history of all key actions in your account

Released

## Cloud Proxy

Availability of Zabbix Proxy nodes

Development

## Version Flex

Stay on the release line that fits your business needs

# Tiers selection

## Small Tier - Big Value

250 NVPS  
 ~300 hosts with 50 items @ 1 min interval

**Fixed price \$250** a month, that's enterprise-grade monitoring without infrastructure headaches.

## Large Tier - 10x capacity

2500 NVPS  
 Scale up to ~3000 hosts

Same product, same features — just scaled.

	Nano	Micro	Small	Medium	Large	xLarge	2xLarge
2 NVPS (New Values Per Second)	50	100	250	1000	2500	5000	10000
2 Starting from	\$ 50	\$ 100	\$ 250	\$750	\$ 1875	\$ 2500	\$ 5000
