Zabbix is a software that monitors and tracks performance and availability of IT infrastructure.

Zabbix is an enterprise-class open source distributed monitoring solution designed to monitor and track performance and availability of network servers, devices, services and other IT resources.

Zabbix is an all-in-one monitoring solution that allows users to collect, store, manage and analyze information received from IT infrastructure, as well as display on-screen, and alert by e-mail, SMS or Jabber when thresholds are reached.

Zabbix allows administrators to recognize server and device problems within a short period of time and therefore reduces the system downtime and risk of system failure. The monitoring solution is being actively used by SMBs and large enterprises across all industries and almost in every country of the world.

Zabbix server virtual appliance 4.4 Medium Performance

By: Zabbix
Latest Version: 4.4.3

Zabbix is an enterprise-class open source distributed monitoring software designed to monitor and track performance and availability of network servers, devices, services and other IT resources. Zabbix is an all-in-one monitoring solution that allows users to collect, store, manage and analyze information received from IT infrastructure, as well as display on-screen, and alert by e-mail, SMS or Jabber when thresholds are reached.

Zabbix allows administrators to recognize server and device problems within a short period of time and therefore reduces the system downtime and risk of system failure. The monitoring solution is being actively used by SMBs and large enterprises across all industries and almost in every country of the world.

Product Overview

Highlights
- All-in-one monitoring solution
- Appliance ready to use out of the box: includes MySQL, Nginx, and PHP
- Highly Performing and Flexible
Zabbix 4.4 - Medium performance

Zabbix SIA
Estimated costs: $470.97/month

Zabbix monitors performance & availability of IT infrastructure

Overview

Zabbix is an enterprise-class open source distributed monitoring solution designed to monitor and track performance and availability of network servers, devices, services and other IT resources.

Zabbix is an all-in-one monitoring solution that allows users to collect, store, manage and analyze information received from IT infrastructure, as well as display on-screen, and alert by e-mail, SMS or any other channel when thresholds are reached.

Zabbix allows administrators to recognize errors and design problems within a short period of time and therapy.
