EVERY ZABBIX PROJECT STARTS WITH....

IZI IT

STEVE DESTIVELLE

IZI-IT founder
French ZABBIX evangelist
Find me on Twitter or Linkedin

IZI IT

THE PROJECT MONITORING STARTS WITH QUESTIONS

- What is the Action Plan ?
- Meetings with the technical staff
- Someone who knows ZABBIX
- The machines (VMs, physicals, …)
- Many lists (hosts, templates, …)
- Even if the project did not started

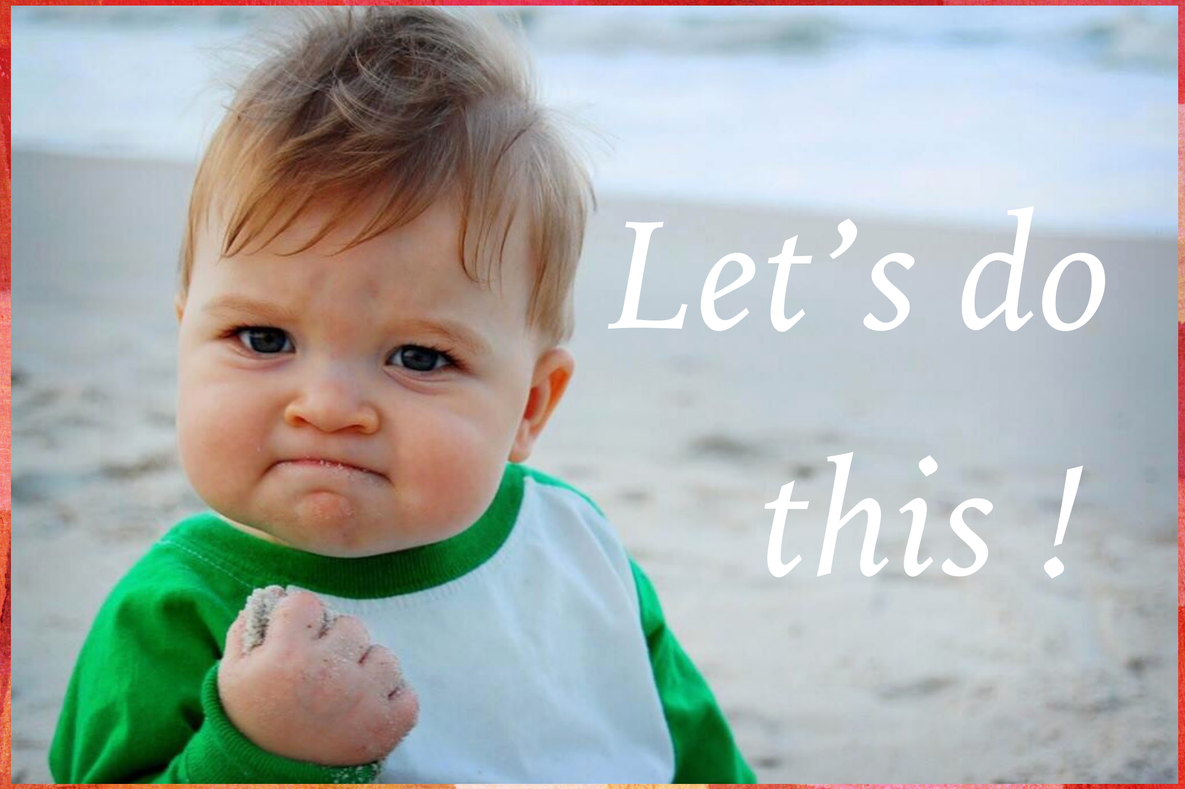
READY TO GO, BUT . . ...

What about the database size ????

What did he say ?
The database !

CREATE A TOOL FOR EVERYONE

- Calculate the ZABBIX database size
- Online and easy to handle
- And that’s all it can do !



Zabbix database size calculator Version 0.3

Housekeeper settings for history

Number of items

Refresh rate (in seconds)

Number of processed values per second

Number of days of History

Housekeeper setting for trends

Number of days of Trends

Housekeeper settings for events

Days of history - Trigger data storage period (in days)

Days of history - Internal data storage period (in days)

Days of history - Network discovery data storage period (in days)

Days of history - Auto-registration data storage period (in days)

Submit

Zabbix database size calculator Version 0.3

History table size

Disk space requirement (GB)
62.764

Trends table size

Disk space requirement (GB)
1.061

Events table size

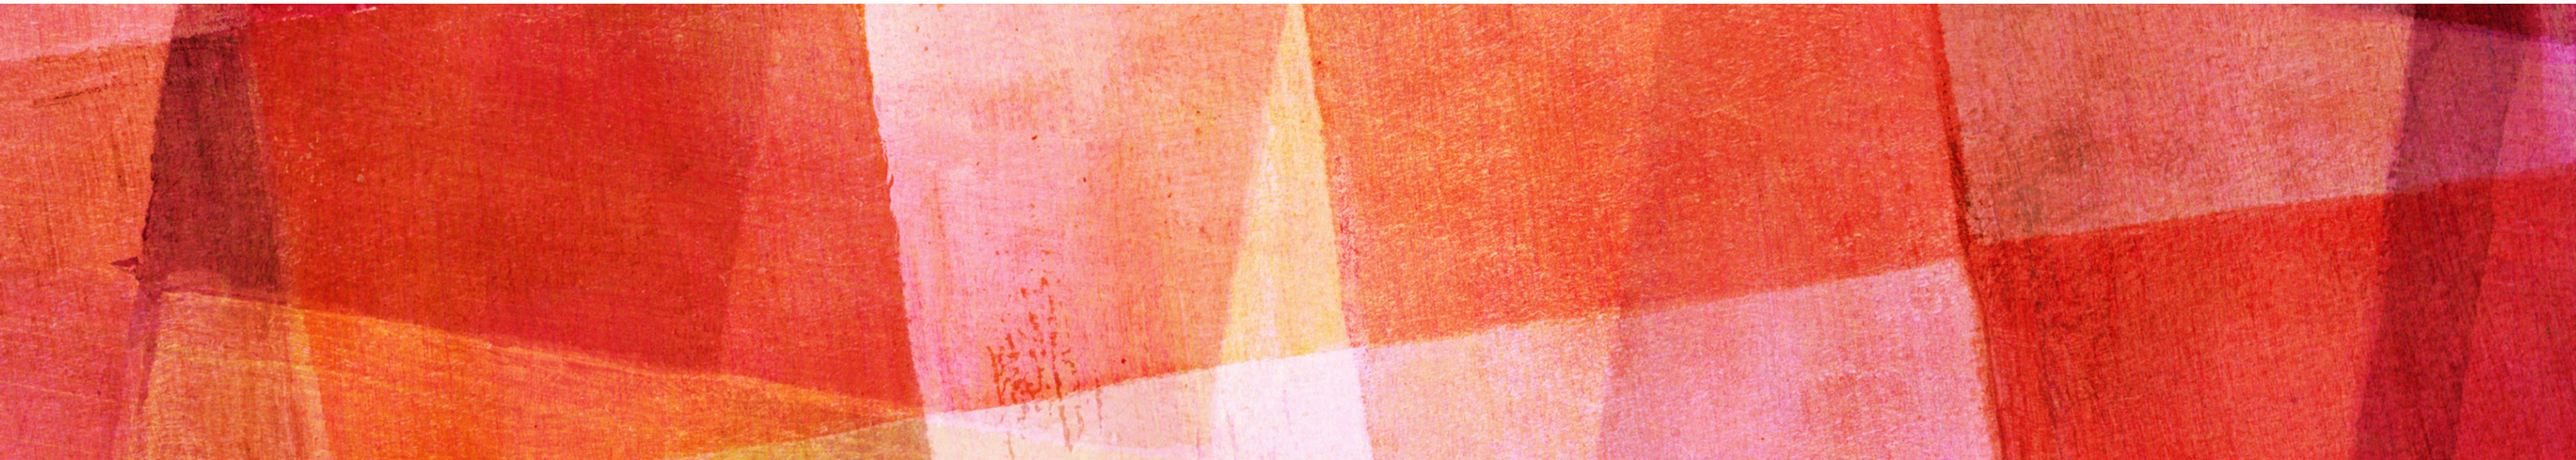
Disk space requirement (GB)
1.255

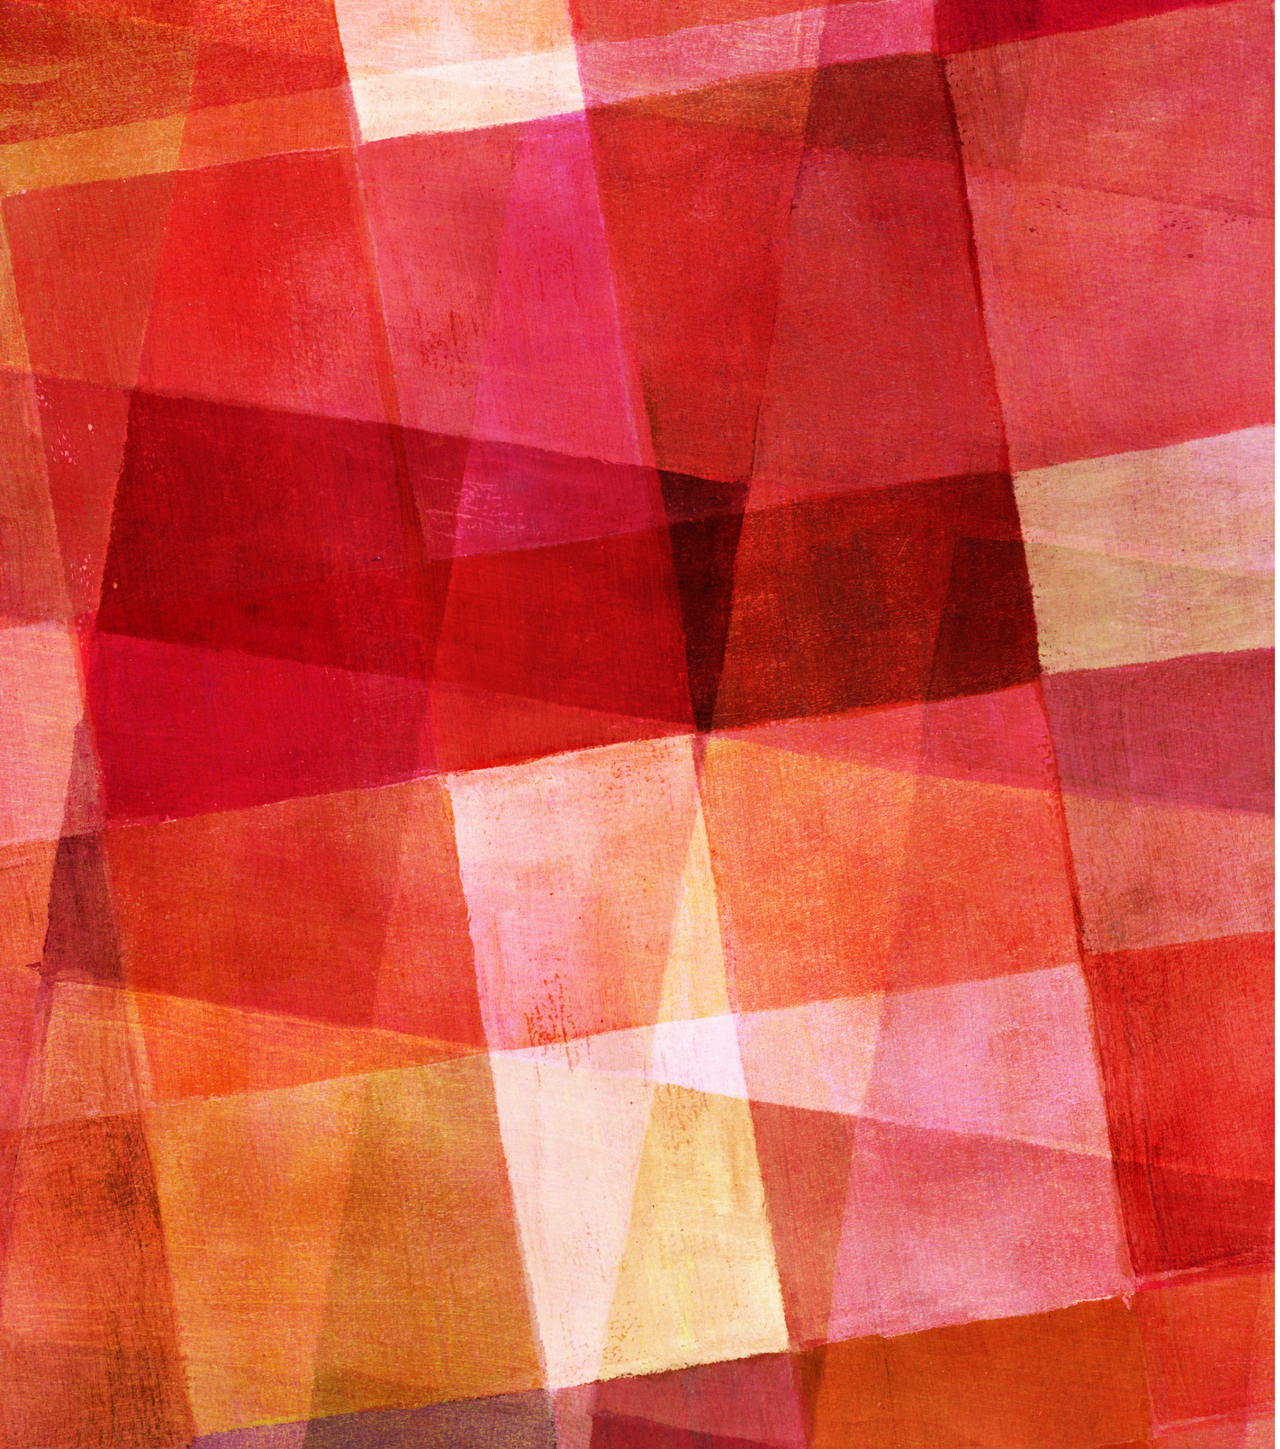
ZABBIX database size

Disk space requirement (GB)
65.08

TIME TO PLAY

http://tools.izi-it.io





WHAT'S NEXT ?

- HTTP**S**
- Postgresql with partition
- Oracle ?

THANKS !
AND MADE IT IZI
