"SIMPLE WAY TO MONITORING MODERN APPLICATIONS"

Daniel Nasiloski

Technical Engineer

ZABBIX

LATIN AMERICA

ZABBIX LATAM

Who am I?

Daniel Nasiloski

- **Technical Engineer** at Zabbix LatAm
- **8 years** experience with Zabbix
- **NodeJS** developer

Application monitoring

- Internet connection
- Process and database ports
- Process and frontend ports
- HTTP agent test
- Logs monitoring

Inside out monitoring

- Identify problems by classes and methods
- Fast response in high severity problems
- Identify suspicious users
- Identify application running but frozen

- Use of slow clients
- Development of their own monitoring intelligence, slowing application performance

Zabbix Sender

- Small client (about 500kb)
- Not a daemon
- Running on demand
- Centralize threshold and monitoring intelligence in Zabbix Server
- High Compatibility
