Company profile

GUDE has been a German manufacturer of high-quality power and monitoring solutions for the demanding AV, IT, KVM professional for over 30 years. They have been proven to improve the **energy efficiency and resilience of AV and IT infrastructures** typically found in network, server, and media closets. Our customers' applications range from distributed enterprise networks and media control systems to data centers and industrial environments. See for yourself which satisfied customers use GUDE products.

Made in Germany is not just a marketing slogan for us. We live Made in Germany. From the development of our hardware and software to the production and final testing of our devices: every single production process is carried out according to the best German engineering knowledge. So that you can rely on **safe and high-quality products**. This is what the GUDE family stands for with its name.

Flexible operating options and economical operation round off the convincing appearance. The expertise built up over many years flows into further developments, new products, and customer-specific adaptations. **Free technical support and professional customer service** are a central component of the sustainable business model.

GUDE in Zabbix

Our templates for our Expert Power Control-Series, Expert Sensor Box-Series, and Expert Net Control-Series can be imported to Zabbix to make the integration of our devices to Zabbix as easy as possible. Our devices are mainly used for remote port switching (ON/OFF), metering of power consumption as well as environment temperature, humidity, and air pressure. Having our devices integrated into a system such as Zabbix allows the user to monitor their IT/AV-infrastructure in terms of power consumption to save energy and therefore reduce electricity costs.
