

ZABBIX

2.3.

Zabbix Cloud logo

Zabbix Cloud is a fully-managed SaaS platform that provides scalable, secure monitoring solutions - without the need for on-premise installation or maintenance.

Although Zabbix Cloud has a slightly different brand identity with a brighter and bolder color palette, it is still an integral part of the Zabbix product suite, providing cloud-based monitoring while maintaining a connection to the Zabbix brand.

The Zabbix Cloud logo features the company name, "ZABBIX," written in white and all caps, placed in the center of a bright red rectangle. To the right, is a bright blue square with a white-stroked cloud icon in the center.

The same guidelines apply as for the Zabbix main logo, as for the Zabbix Cloud logo: logo must not be altered, and none of its components should be removed.
