Can you please do a video on Zabbix Proxy and how to handle a failure whereby it triggers alerts for devices behind said proxy? How do you stop the cascade of alerts?

Hi Dmitry, really nice video. Thanks for sharing - just one query like I understand, we need to upgrade all client agents as well at the same time once server is successfully upgraded.

Dmitry Lambert 2 months ago

Agents are backward compatible. You can upgrade them later, or don't upgrade at all.

TIMESCALEDB EXTENSION IS A VERY PROMISING TECHNOLOGY.
IT WORKS WELL WITH ZABBIX AND GIVES SOME QUITE NOTICEABLE ADVANTAGES OVER RUNNING ZABBIX WITH STANDARD POSTGRESQL DATABASE.

There are some methods for installing zabbix with high availability. We decided to think out of the box.

Excited to show a Zabbix environment in Docker Swarm where enables high availability and scalability including between different regions.

Over 5k of hosts, 280k of itens, 450 nvps.
