Long, long time ago...

- 1.8 was released on 2009.12.07
- Work on the first new feature for 2.0 started at 2009.12.29
- It was "skip" mode for logfiles

How was Zabbix server called initially?

zabbix_suckerd
StartSuckers=5

zabbix_suckerd #4 started

[Sucker. SNMP:OFF]

It's all in the name

- 1.10 or 2.0 ?
- The time had come

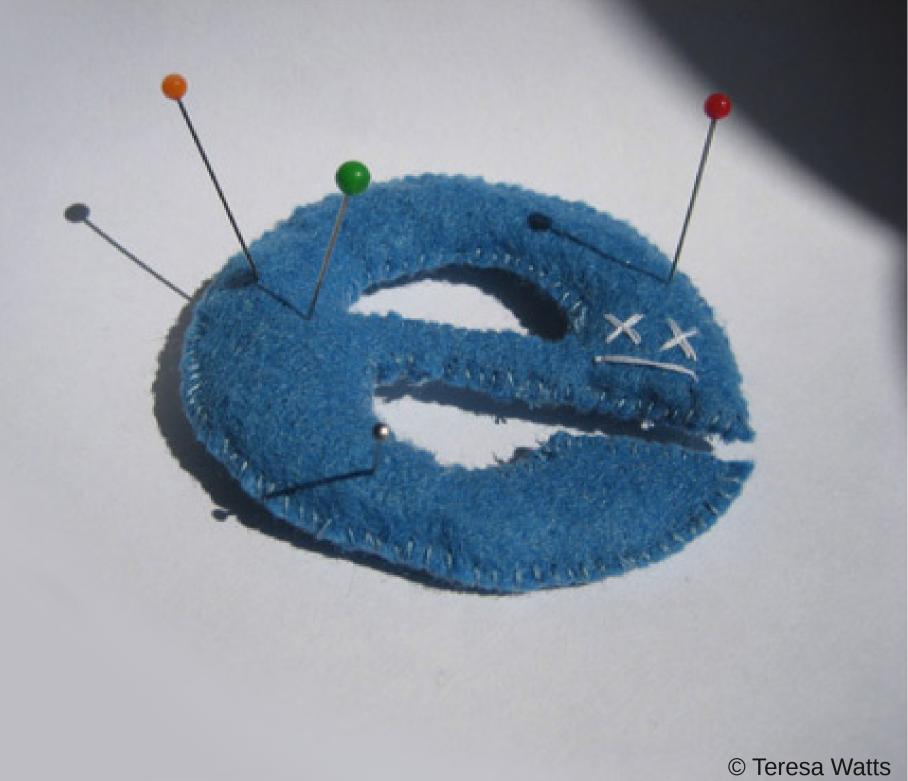

Today

- Frontend
- Performance
- Other notable new features

Who is using trunk? ...in production?

Frontend

- Changes all around
- Network map improvements

WARNING! You are using an outdated browser.

Zabbix frontend is built on advanced, modern technologies and does not support old browsers. It is highly recommended that you choose and install a modern browser. It is free of charge and only takes a couple of minutes.

Google Chrome Download page

Mozilla Firefox Download page

Internet Explorer Download page

Opera browser Download page

Apple Safari Download page

Why is it recommended to upgrade the web browser?

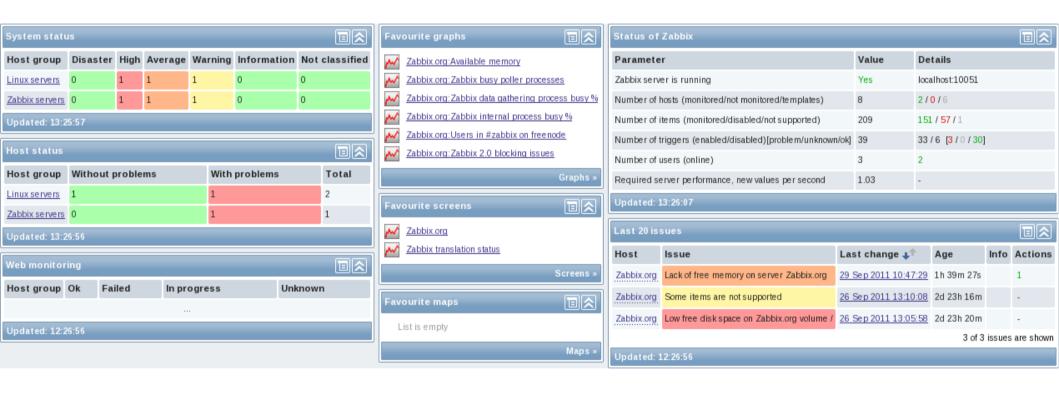

New browsers usually come with support for new technologies, increasing web page speed, better privacy settings and so on. They also resolve security and functional issues.

Sort triggers in screens

No legend

Templated screens

- Add screens to a template
- View them on hosts

Is this media type actually used?

Description	<u>Type</u>	Used in actions
<u>Email</u>	Email	a, action no user, action no user, some action, Test Action
<u>Jabber</u>	Jabber	<u>a</u>
<u>SMS</u>	SMS	-
Test Script	Script	SNMP Action
ccc	Email	action no user, integrity

Escalations = ON

- Escalations can not be disabled
- Trigger value = PROBLEM
- "Recovery message" becomes more intuitive

Visible host name

Supports UTF8

Host name dc12app427

Visible name Liepāja, aplikāciju serveris

New and updated translations

- New translations
 - Turkish (php bug!)

Displaying hosts from a host group

Network map improvements

Editing

Grid selection saving

- Showing the grid
- Aligning to the grid
- Grid size

Select elements by dragging

Yeeeeah

New icons

Perform, 'dammit

Caching helps

- General config
- Triggers
- User macros

General caching

- General configuration caching
 - Global refresh periods
 - Discovery group
 - Custom severity names
 - ... other things

Trigger caching

- Most trigger detail cached
- Lots of triggers less of an issue

User macro caching

- 1.8 per individual daemon process
- 2.0 global

Housekeeping...

...on PostgreSQL

Notable features

Database integrity

Nanosecond support

Goodbye, UNKNOWN

- UNKNOWN trigger state removed
- "Fuzzy" marker

Event export to CSV

Export visible events

Inventory autopopulation

- Define which inventory field an item populates
- Any item type
- + inventory report

Inventory related items

- Hardware chassis details
- CPU frequency, vendor, model...
- PCI/USB device list
- MAC addresses
- Operating system name, architecture
- Installed package list

More items

- system.localtime timestamp/human readable
- DNS items Windows, remote servers, timeout, retry count...
- ...more

Skip the old

- Before add logfile, kill server
- Now keep server alive

Ability to send empty strings for custom checks

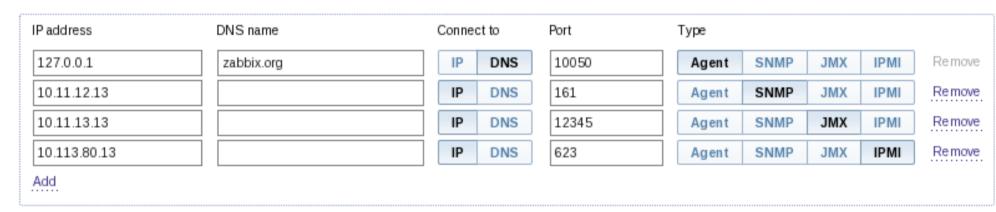

- Empty strings
- External less hardcoding
- vfs.file.contents[]

What's it do?

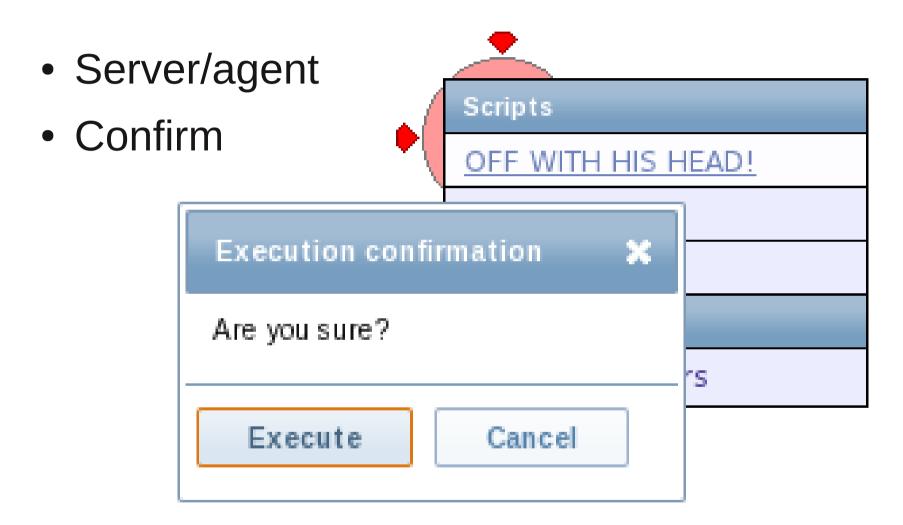

Item descriptions

Multi-homed host support

Interfaces

Global scripts

Remote commands

- Global scripts
- SSH / telnet
- On the server

Discovery & auto-registration

- DNS
- IP
- Port

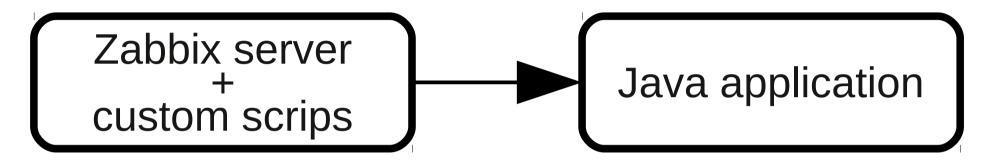

Integrate the trap

- Still uses snmptrapd
- Embedded Perl faster
- No need for a custom script
- May use SNMP-TT

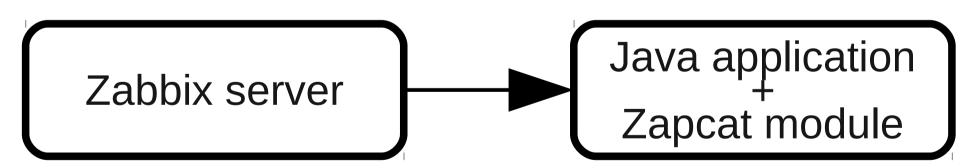

When the trapper was integrated in the server?

JMX: before

Custom scripts

Zapcat (Zabbix-Java bridge)

JMX: after

Zabbix server

Zabbix Java proxy

Unmodified Java application

Boolean item type

Translate text to number

→ 1	→ 0
true	false
t	f
yes	no
y	n
up	down
running	unused
enabled	disabled
available	unavailable

LLD

• What's that?

Can we define it?

Multiples of things that differ per host

Built-in LLD: network

Network interface discovery

Built-in LLD: filesystems

Mounted filesystem discovery

Built-in LLD: SNMP

- Any MIB subtree
 - Network interfaces
 - Applications
 - ...anything

DNF

Hail the Duke

WHEN 2111

When it's ready

When will it be ready?

- Blockers
- Some 85 left

Thanks for surviving
